SUMMARY

Computer Science (AI/ML) undergraduate at SRM Institute of Science and Technology (expected graduation: 2027) with hands-on full-stack development experience across React/Next.js front-ends and Node.js/Python back-ends. Comfortable working across the stack — building UI components, designing and integrating REST APIs, working with SQL and NoSQL databases, and debugging issues end-to-end. Familiar with Git-based collaborative workflows, code reviews, and writing clean, reusable code, gained through internships and self-directed projects. Quick to pick up new tools and frameworks, and eager to contribute to real product development in a hands-on, in-office, team-based environment.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI/ML) 2023 – 2027
SRM Institute of Science and Technology, Ramapuram, Chennai CGPA: 8.88

TECHNICAL SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript
Frontend: HTML, CSS, JavaScript, React, Next.js
Backend: Node.js, Express.js, Spring Boot, FastAPI, RESTful APIs, JWT, OAuth
Testing, Version Control & Collaboration Tools: JUnit, Mockito, Git, Docker, Postman, Linux
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Databases & Cloud: PostgreSQL, MongoDB, AWS, Firebase, Vercel
AI/ML & Deep Learning: Machine Learning, Deep Learning, Neural Networks, NLP, PyTorch, TensorFlow, Scikit-learn
Data Analysis & Visualization: SQL, Excel (Pivot Tables, VLOOKUP, Power Query), Google Sheets, Tableau, Power BI, Pandas, NumPy, Statistical Analysis, A/B Testing
Productivity Tools: Google Workspace (Docs, Sheets, Slides)

EXPERIENCE

AI Intern – Infosys Springboard | Remote Nov 2025 – Mar 2026

- Built and tested Python-based backend pipelines with automated validation checks, debugging issues across the stack and reducing preprocessing errors by ~20%.
- Built and integrated backend workflows and processing scripts using SQL and Python, cutting manual effort and turnaround time while keeping code modular and reusable.
- Collaborated through pair programming, code reviews, and Git-based version control, following established coding and quality standards to ship reproducible, production-ready code.

AI Intern – Edunet Foundation | Remote Apr 2025 – May 2025

- Developed end-to-end backend workflows in Python and SQL for data collection, processing, and evaluation, coordinating with a small team in an agile, milestone-driven environment.
- Built reusable, testable modules for feature engineering and evaluation, applying clean-code practices to improve maintainability across the team's shared codebase.

PROJECTS

TaskFlow – Full-Stack Task Management App with Auth Jul 2026
Tech Stack: React, Node.js, Express.js, MongoDB, JWT, REST APIs

- Built a full-stack task management app with a React front-end and a Node.js/Express REST API backend, supporting create, read, update, and delete operations on tasks and projects.
- Implemented user authentication and authorization with JWT, protecting API routes and scoping data access per user account.
- Modeled the data layer in MongoDB and wrote integration tests for the API, debugging edge cases and validating responses with Postman.

HydroGuard.ai – AI-Powered Urban Flood Resilience Platform Jan 2026
Tech Stack: Next.js, React, TypeScript, Deck.gl, Mapbox GL JS, FastAPI, Google Earth Engine, Azure, Scikit-learn, PostGIS, Terraform

- Built the front-end with Next.js, React, and TypeScript, working with designers to implement interactive Deck.gl/Mapbox GL JS map visualizations.
- Built a FastAPI backend with REST endpoints and a PostGIS database to serve geospatial data to the front-end, achieving sub-50ms response latency.
- Debugged issues across the stack and automated infrastructure provisioning with Terraform on Azure for consistent, reproducible deployments.

Deepfake Image Detection Using Data Mining and Deep Learning Jan 2026
Tech Stack: Python, TensorFlow/Keras, OpenCV, Scikit-learn

- Built a preprocessing and feature-extraction pipeline in Python, writing clean, reusable code to prepare a large image dataset for training.
- Designed, trained, and debugged a CNN-based classification model in TensorFlow/Keras, achieving 92% validation accuracy through iterative testing and tuning.

CERTIFICATIONS

Core Engineering: Java Programming (Udemy), Database Management System (NPTEL-IIT Kharagpur)
Specialized Tech: MongoDB Basics (MongoDB University), Machine Learning Specialization (DeepLearning.AI)

ACHIEVEMENTS

- Solved 330+ Data Structures & Algorithms problems on LeetCode.
- Appeared for the SSB (Services Selection Board) interview on two occasions.

LANGUAGES

English, Hindi
